

ABELMed Inc. launches ABEL-in-a-Box Electronic Medical Record solution for fast deployment to physicians and clinics

BURLINGTON, ON, May 10, 2013 /CNW/ - Physicians and medical clinics looking to rapidly deploy a funding eligible electronic medical record (EMR) solution with a simplified, single monthly fee have a new option with ABEL-in-a-Box, a practice enhancing system developed by ABELMed Inc., working in partnership with TracMed Inc.

"ABEL-in-a-Box enables physicians and medical clinics to rapidly implement an electronic medical record system, while offering straightforward pricing and cost certainty," said Arun Rele, President & CEO, ABELMed Inc. "This quick-to-implement package increases practice efficiency, helps improve patient care and saves time for physicians. ABELMed and TracMed have developed an attractive payment mechanism with one single monthly fee and no upfront payments. All physicians and clinics in Ontario can take advantage of this opportunity, whether they are applying for funding or not. "

ABEL-in-a-Box is a bundle of EMR software, computer hardware and associated services designed to be activated and deployed onsite within a week. If the physician or clinic is transitioning to ABEL-in-a-Box from a previous EMR implementation, ABELMed and TracMed have powerful tools to quickly import the records into the new system so the doctors do not have to worry about practice down time.

"With the right system and the right team to provide ongoing 24/7 support to the physicians, electronic medical records can make life much easier and more efficient for physicians, patients and the broader healthcare system," said Guna Deivendran, CEO, TracMed Inc. "As a preferred sales, training and implementation partner for ABELMed in Ontario, we are pleased to introduce ABEL-in-a-Box to physicians. We recognize the importance of helping clinics make the switch with minimal disruption to their operations and have a strong team to help physicians transition their practices to EMR seamlessly and efficiently."

TracMed Inc. (www.tracmed.com) of Mississauga is a healthcare information technology (IT) services firm that manages information technology needs of physicians and clinics, including the installation and implementation of electronic medical records (EMR). The company specializes in health IT consulting, health IT personnel placement and custom software development.

ABELMed Inc. (www.abelmed.com) of Burlington, Ont., is a proven Canadian pioneer in the health care IT field, focused on improving the quality of life for healthcare providers and their patients. ABELMed is a Microsoft Gold Certified Partner with 36 years of experience in providing medical software and services. The company offers clinical and practice management systems that include an electronic medical record solution for medical and dental professionals.
